

Subject: PMMC PACS Downtime Access from home

Login to <http://apps.providence.org>.

All users should have an MS Outlook icon in their Citrix Neighborhood:

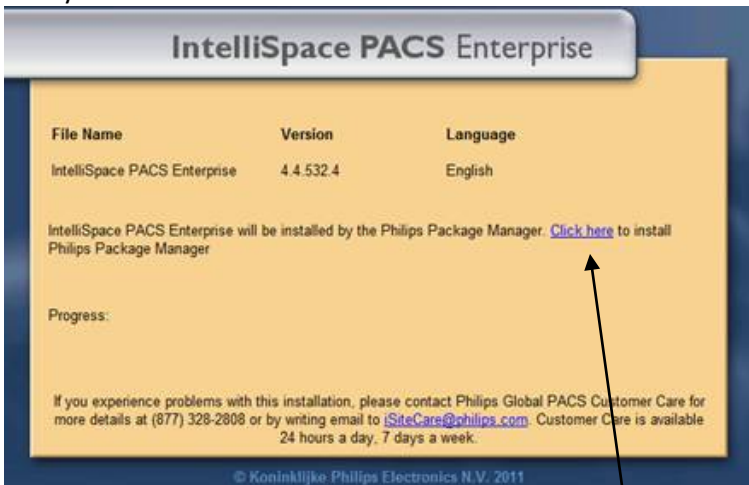

Outlook 2007

Launch Outlook 2007, or whichever version is present.

From the Citrix Outlook email window, launch this link to the BCS: <http://170.220.225.200/>. This will launch the Philips IntelliSpace Downtime app. Multiple windows will appear during the process.

First you will see this window:

If nothing appears to be happening, click the “Click here” link to install the Philips Software. After clicking the link, you will see the following window appear at the bottom of the page:

Click on the “Run” button. This will also start the Philips software setup process. You will then see the following window at the bottom of the page:

Click on the “Allow for all websites” from the Allow dropdown box.

You should see the following window appear (notice the Downtime PACS):

This is the PMMC IntelliSpace downtime app. Please test and call Michael with any questions.
