

## vRad Discrepancy Reporting Guideline

The purpose of this guideline is to establish consistent reporting of vRad preliminary report discrepancies as reviewed by the MRG Radiologists. This will ensure the proper notification of the level of discrepancies reported and also reduce the steps to submitting information to vRad.

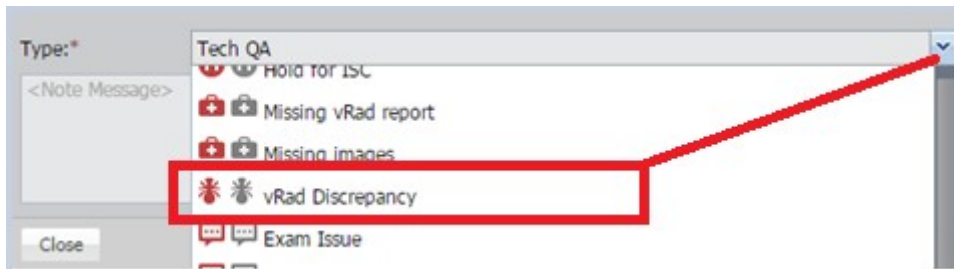

### Scope

This guideline applies to any discrepancy as determined by a MRG Radiologist after an exam has been interpreted by vRad.

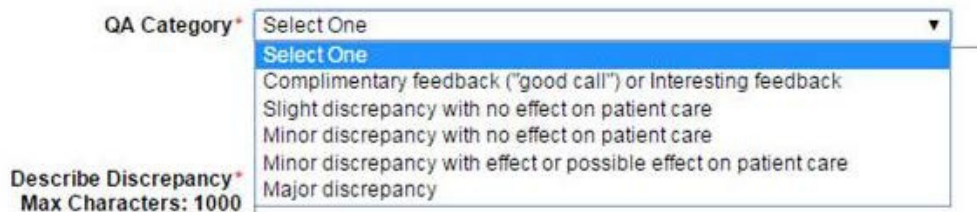

### Guideline

Steps for reporting discrepancies:

1. Place Communication Note in zVision using the drop down, please choose "vRad Discrepancy"

2. Populate the Note box with the discrepancy information **and** the QA Category (Level of discrepancy) as listed below:

3. vRad Admin can then monitor a worklist filtered to this type of communication note and submit for processing with vRad.
